

# TRU ABRASIVES™

A clean crushed glass abrasive.

## AUTOMOTIVE:

TruAbrasives are the top choice for automotive restoration due to its ability to carefully remove rust and paint from delicate areas of antique cars, and fine profile that negates the need for sanding. Our crushed glass abrasive is inert with a stable pH, so it is not necessary to wash the car with a vinegar solution post-blast.

TruAbrasives, made from 100% recycled glass, are preferred for the environment and your health. It is suitable for use around water, and Beryllium is not listed on our SDS.

Typical Profile	2.3 mil	3.3 mil	3.8 mil
Surface Finish	SP-5	SP-5	SP-5

### VOLKSWAGEN BUS

TruAbrasives were used to remove old paint on a Volkswagen bus. Crushed glass is ideal on automotive applications for delicate areas of antique cars or carefully removing rust.

TruAbrasives were used to restore the vehicles in these project photos. Photos are courtesy of California Dustless Blasting.
